- Stylish European semi-cassette
- Appearance of facades with discreet elegance.
- Custom width sizes: 8' - 40'
- Arm Projection: 6', 8', 10' & 12'

Operation: Spettmann hardwired motor, remote controlled or a gear box with a 5' crank handle.

SEMI-CASSETTE STYLE AWNING

SKY - German state of the art semi-cassette awning enclosure designed to protect the fabric and operating system from the elements of weather.

- Aluminum semi-cassette
- Custom width sizes: 8' - 40'
- Arm Projection: 6', 8', 10' & 12'
- Heavy-duty spring, anti-rust stainless steel cable system installed in each arm

Operation: Spettmann hardwired motor, remote controlled or a gear box with a 5' crank handle.

OPEN STYLE AWNING

MONARCH - A long history of proven reliability and durability. Easy to operate and maintain.

- Open style awning
- Custom width sizes: 8' - 40'
- Arm Projection: 6', 8', 10', 12' & 13'
- Heavy-duty spring, anti-rust stainless steel cable system installed in each arm.

Operation: Spettmann hardwired motor, remote controlled or a gear box with a 5' crank handle.

RETRACTABLE WINDOW AWNING

VENUS - Retractable arms to help provide privacy and block the sun from your window.

- Standard width sizes: 2' - 20'
- Arm projection: 24", 30", 36", 42" & 48"
- Heavy duty spring loaded arms with anti-rust material
- Stainless steel hardware

Operation: Spettmann hardwired motor, remote controlled or a gear box with a 5' crank handle.

Optional feature: Aluminum semi-cassette to protect the operating system and fabric from weather.

DROP SHADES

APOLLO - A classic drop shade that can be used for interior or exterior over windows, sliding glass doors or on patio awnings to provide privacy or shade. Great for blocking out that sun glare from your television while you watch the game and still be able to enjoy the view.

- Custom width sizes: 2' - 20'
- 8' tubular steel rod guide system
- Stainless steel hardware

Operation: Spettmann hardwired motor, remote controlled or a gear box with a 5' crank handle.

Optional feature: Aluminum semi-cassette to protect the operating system and fabric from weather.

MOTORS

We have a motor for every job... from the hardwire switch to the plug-in style, from remote controlled to hand-crank.

- Powerful 20 Nm and 50 Nm electric motors
- Adjustable: UP and DOWN limit settings
- 70 & 78 mm crown and drive included
- 2 motor styles: Hardwire or remote operation
- Remote control up to 5 channels
- Emergency manual override available
- 5 year warranty

Spettmann motors: Add the convenience of a wireless, remote activated awning or window shade, with a simple push of a button!

ACCESSORIES

WIRELESS REMOTES

Available with multi-function capability. Operate multiple awnings with the convenience of one remote!

DROP VALANCE

Provides extra privacy as well as protection from the sun. Hidden inside the front bar when closed or lowered to provide 4' - 6' of shade.

LED LIGHTS

These built-in LED lights are powered by our 12v motor on the awning and controlled by remote control.

FRONT SCREEN

Concealed behind the valance when closed. The front screen is excellent economical shade screen to add to any Spettmann awning. Comes in 12', 16', & 20' widths with a 54" drop shade screen. Mesh screen black.

VIBRATION SENSOR

Mounted to the front bar, the sensor can detect any motion during windy conditions. Sending a signal to motor to close the awning. The sensitivity level can easily be adjusted.

HOOD

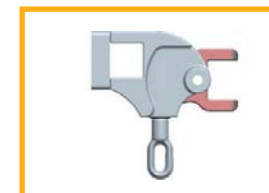

The hood is made from extruded aluminum, provides excellent protection for the fabric and hardware components.

For use with our Monarch awning only.

CRANK PITCH

Easily adjust your pitch with just the turn of the crank handle, adjusts awning from 0° - 45°.

WIND POLE

Protect your awning from very costly damage in the case of sudden gusts of wind. The wind pole will safely release from the base if awning is closed without securing the poles. The base can be attached to any surface.
