SMART-SHADE
by Spettmann
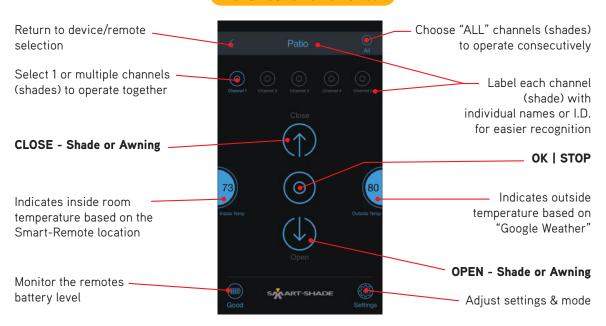

With the Smart-Shade App you can use your iPhone, iPad, or android
to operate your awnings and drop shades through the app's Smart Remote Control Interface.

Standard functions:

Return to device/remote selection

Select 1 or multiple channels (shades) to operate together

CLOSE - Shade or Awning

Indicates inside room temperature based on the Smart-Remote location

Monitor the remotes battery level

Choose "ALL" channels (shades) to operate consecutively

Label each channel (shade) with individual names or I.D. for easier recognition

OK | STOP

Indicates outside temperature based on "Google Weather"

OPEN - Shade or Awning

Adjust settings & mode

NEW Smart-Shade features for 2021

• WEATHER ALERT/WARNING NOTIFICATIONS
Our app can send an alert to the customer through a pop-up text message on their phone to warn of any possible hazardous weather conditions and advise to secure any open shade device. This weather-related warning is based on our app's connection to "Google Weather".

• COMMAND NOTIFICATIONS
A pop-up notification can be sent to the customer whenever a command is given to open/close a shade through the app via Bluetooth or WiFi.

• CONTROL THE AMOUNT OF SHADE
When using WiFi the customer can now control the amount of shade they want. Just ask "Alexa" to "Open or close awning" at any percentage based on 5% increments.

• WIFI UPDATED FIRMWARE
New firmware allows our WiFi hub a quicker response time and a much stronger signal.

• OPERATE MULTIPLE SHADES
Open and close 2 different shades from separate remotes simultaneously.

• OPTIONAL MULTI-COLOR LED LIGHTS
Our LED lighted arms now can have colored lights with different color choices and sequences, all can be operated from the Smart-Shade app on customers phone.

• OPTIONAL MUSIC APP CONTROL
Connecting the music being heard on your smart phone can now be played on your smart speakers through Bluetooth.
